REAL-TIME FLEET TRACKING & DATA ACCESS

With Fleet Online V-PER features 24/7 access to real-time vessel performance data. All data is made available as concise information tailored to the needs of each decision-maker. This way V-PER enables fact based decisions and helps to optimize your fleet's energy efficiency and overall performance levels wherever you are.

BENEFITS PROFITABILITY

- 24/7 real-time tracking of your fleet's performance & condition, e.g. position, fuel consumption & ship speed
- Alarm functions
- Reduced fuel consumption and emissions due to increased transparency: complete onshore real-time vessel performance overview
- Each monitored parameter can be tracked to every single piece of data thus helping to exactly identify areas of energy loss or reduced efficiency
- Long-term insight and improved decision making

KEY FEATURES

- Secured web interface providing easy to read-off and concise onboard information – accessible from everywhere also with mobile devices
- Synchronized data onboard and onshore as a basis for joint decision-making
- Online charts
- Real-time voyage tracking and performance data display
- Alarm functions
- Customizable views
